About the ComparativeInsite Report

area with that part of the study area in which an organization's core people reside. To accomplish this, a

System.

The ComparativeInsite report provides an organization with a

variables from within the Experian Mosaic Segment of a study

Mosaic Profile of both the study area and the organization's core people is generated within the MissionInsite PeopleView

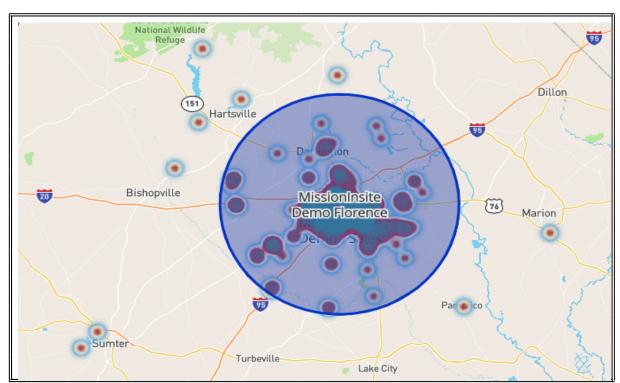

broad comparison of the demographic profile of a defined mission area with a demographic profile of an organization's core people*. It accomplishes this by matching a select set of

Three Sections

• Who Are We? Who is Our Neighbor?

People and Community Mosaic Profile Comparison

Financial Potential Estimate

THE STUDY AREA

Who Are We? Who is Our Neighbor?

Total People	821	Total No. of Mosaic Segments in Study Area	68

Other	5.5%	3,058	3.7%	17	66
	100%	55,125	100%	448	

Notes:

1. Percentages for Average Age Head of Household and Estimated Household Income will not add up to 100% unless all 71 types are found in a study area (which is unlikely in most cases).

2. Presence of a Child sub categories will not add up to the Presence of a Child because a household may cross subcategories thus the total of the subcategories can be greater than the primary category.

3. The Diversity score is based upon the racial/ethnic diversity of each Mosaic Type. The scale is 0 to 5 with 0 a very low diversity and 5 very high diversity.

4. The Racial/Ethnic categories overlap somewhat. A household may include two or more categories. For a real analysis of racial/ethnicity, please obtain a regular demographic report from MissionInsite.

Estimated Median = L + $(n/2) - cfb \times w$ fm

where:

L is the lower class boundary of the group containing the median

n is the total number of data

 $\mathbf{cf}_{\mathbf{b}}$ is the cumulative frequency of the groups before the median group

 \mathbf{f}_{m} is the frequency of the median group

w is the group width
