

The MinistryInsite Priorities Report 2021

Prepared for: MissionInsite
Study area: Gwinnett County

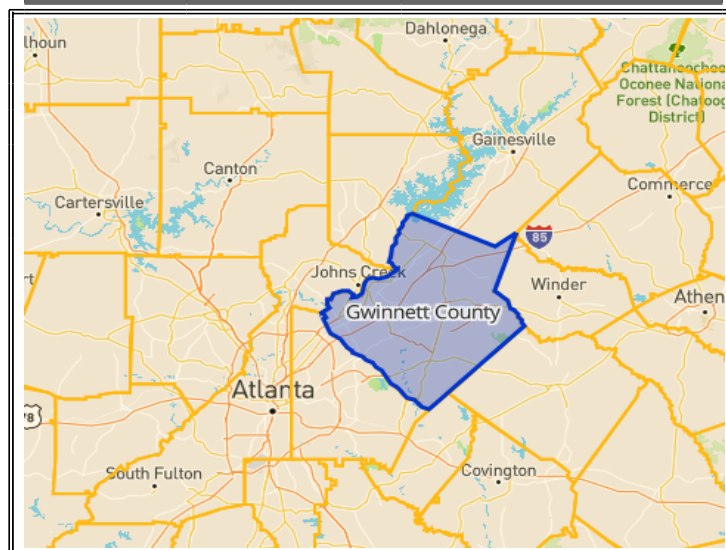

Date of Report: 2/3/22
Quad Project Version: 2021

About the Quadrennium Reports

The Quadrennium Project provides a projection of likely religious beliefs, preferences, and practices for a defined study area. This report is based on the Quadrennium Project national survey, which MissionInsite conducts every five (5) years. While general religious data is available through various organizations, only MissionInsite can provide current local geography projections. This report is based upon the 2021 Quadrennium Survey.

The 2021 Quadrennium Survey series contains two reports. **ReligiousInsite** provides insights into community beliefs and religious preferences. **MinistryInsite** focuses on practical applications of the 2021 survey. It includes life concerns, reasons for non-participation (or considered nonparticipation) in a religious congregation or community, and a list of preferred ministries or programs. These are based on the specific study area. Customized priority lists address the study area’s concerns, program and ministry preferences and more.

The Study Area

The **ReligiousInsite Priorities** Report and **MinistryInsite Priorities** Report capture the priorities of some survey questions based upon strengths of beliefs plus the direction of the beliefs, whether towards agreement or disagreement. These two reports correspond to the full reports.

Information Sources and Social Media Preferences

Media options for obtaining information today have exploded. The days of a few sources, such as major newspapers or network news programs have been replaced with multiple cable news networks, online news outlets, and social media sources.

To help people sort through this mass of media options, the project asked respondents to indicate their preferences in a series of "forced pairs". The data reveals which sources of information this area prefers, so you can identify the best channels for reaching the intended audience.

Interpreting the Report

The Quadrennium Project reports help you interpret data at a glance.

Comparative Indexes: All variables have a column called Comparative Index, which compares your study area with a larger area. For this report, all comparisons are with the national averages for the data item.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.

Ratio: Calculated using Somewhat Agree + Strongly Agree divided by Somewhat Disagree + Strongly Disagree

Color Coding: The Comparative Indexes columns are color coded so you can easily spot changes and the direction of change.

Index: Above Ave Ave Below Ave.
