

# DioView™

**Streamline financial reporting between parishes and diocesan offices.**

PDS DioView™, coupled with PDS DioView Server™, helps your diocese streamline the process of financial reporting by enabling your parishes to submit their financial data online and equipping your diocese with the ability to consolidate parish reports.

Problem to Solve:	PDS DioView Solution:
The diocese needs to view financial information from their parishes and institutions.	Institutions with PDS General Ledger™ and PDS Ledger/Payroll™ can add account information to their solutions and upload it to PDS DioView™. Customize your view of accounts and export information to Microsoft® Excel® spreadsheets or Open Office Calc for more in-depth analysis.
The diocese needs to map outside accounts to the master PDS Chart of Accounts (COA).	Parishes may have accounts outside of the standard diocesan master COA. These accounts are mapped to accounts in the master COA within PDS DioView. The diocese can map these accounts or let individual churches map them.
Reporting is crucial for the diocese.	Choose from dozens of pre-defined reports to generate lists and comparisons for analysis, or design your own reports to meet immediate needs.

## Key Features:

- Integrates with PDS General Ledger, PDS Ledger/Payroll, and Realm Accounting
- Quickbooks Interface
- Account mapping to the diocesan master PDS Chart of Accounts
- Quick Lookup feature to search for and view a parish's information instantly
- Maintain up to eight years of budget information from parishes that use PDS Ledger or PDS Ledger/Payroll
- Keep an unlimited amount of income and expense account records
- Customize the way you view lists of accounts
- Keep up-to-date contact information for parishes and institutions
- Export information to Microsoft® Excel® spreadsheets or Open Office Calc for more in-depth analysis
- Launch PDS Ledger to see transaction level detail
- Choose from dozens of pre-defined reports
- Design your own reports
- Group the COA for specialized reports
- Use Easy Reports and simply select the fields you want to print
