

# Parish Life

*An online parishioner portal for anytime access to your parish.*

Parish life doesn't happen strictly inside the walls of your church. Give your parishioners ways to connect and contribute to your parish using the Parish Life portal.

Problem to Solve:	Parish Life Solution:
The parish office needs up-to-date contact information for parishioners to ensure they can receive parish communications.	As parishioners update their contact information through Parish Life, parish office staff can sync those updates to PDS Church Office.
Parishioners want more control over who sees their personal information.	Parish Life gives your parishioners control over their privacy by choosing who sees their contact and personal information. This gives them peace of mind knowing their information isn't shared without their approval.
Parishioners want an easy way to donate on the go and view their giving history.	With the integration of Abundant in Parish Life, parishioners can give and view their giving history online or in their mobile browser through the Parish Life portal.
Parishioners want to view parish activities and mass times.	Parish staff can integrate the parish's Google calendar with Parish Life so parishioners can view parish activities in the portal. Staff can also set up Mass times for parishioners to view and register if needed in Parish Life.

## *Parishioners can:*

- Follow an easy sign-up process for Parish Life
- Set their privacy settings
- View and update their online profile
- Upload a profile picture
- View their parish directory
- View their online dashboard
- View their giving history
