Realm Events

Make it easy to share the good works of your church.

Realm Events helps you to set up and organize churchwide registration events, smaller group events, and communicate the important details to those who need it most.

Problem to Solve:	Realm Events Solution:
Churches need to be able to create and manage registration events.	In Realm, you can create and manage churchwide registration events as one-time or recurring events, allow them to be paid, free, or discounted, and provide additional details such as custom questions or additional items needed for the event. Registration events can be posted to the Newsfeed so everyone is informed.
Group leaders need to be able to create and manage smaller group events.	Group leaders can create and manage smaller events such as weekly group meetings directly in Realm. They can allow for RSVP's, create as a one-time or recurring event, and allow group members to bring items such as food or drinks. Like registration events, group events can be posted to the individual group's Newsfeed to help keep group members connected.
The congregation needs insight into what events are coming up at the church.	Realm provides an events list, which shows all the events that are happening at the church. Congregants can filter on events based on name, the events they're already RSVP'd for, or just churchwide registration events.

Realm Events Advantages:

- Events live directly in Realm - this means you never have to worry about duplicating work in multiple systems.

- Create, edit, and manage events right when you need to from your desktop, mobile device, or the Realm Connect app.

- Empower your congregation by allowing them to find events that interest them with the event list. They can find events based on a particular day, which of their groups it's for, and more.

- Spread the word about events to those not yet connected to your church by placing a link on your website or social media page.

Key Features:

- Register for churchwide events

- RSVP for group events

- Create one-time or recurring events

- Post events to the Newsfeed

- Communicate with registrants

- Take attendance for events in Realm

- Check in for events

- Mark attendance for events

- Accept registration payments

- Offer registration discounts

- Allow custom questions

- Purchase items for events

Realm Events help bridge the gap between individuals and a connected ministry.
