

Check-In

Safely and securely check-in visitors and congregants

Check-in can be used for worship, small groups, childcare, or events. Realm Check-In allows you to check-in people for all of these as well as take attendance.

Problem to Solve:	Realm Groups Solution:
Churches need to check in and keep track of children.	With Realm Check-In, you can customize check-in badges to include a security ID that matches a child to a parent, list any allergies, classroom information, and more. Parents can pre-check their children in via the Connect app and complete check-in at a kiosk.
Churches want to provide a contactless check-in option.	Congregants can check-in their entire family via the Connect app, and kiosks are self-service.
Congregants want to check-in before arriving.	With the Realm Connect mobile app, congregants can check in their entire family from their mobile devices. If badges are required, check-in can be completed quickly and easily at a kiosk.
Volunteers need to check in to events.	Volunteers can check in to their serving team before their arrival via the Connect mobile app or at a kiosk when they arrive.
Churches need to take attendance.	The attendance dashboard in Realm is automatically updated when people check in.

Realm Check-In Advantages:

- Customizable kiosk options
- Check-in for groups, events, and volunteer opportunities
- Mobile check-in for the entire family
- Automatic attendance tracking

Realm Check-In makes it easy for your congregation to check in to anything they are participating in.
