

# Realm Inform

*Streamline database management for your entire staff.*

Administration-focused churches use Realm Inform to equip staff with tools for people management and reporting for better ministry insights. Best of all, it's all cloud-based, which means staff can access it anywhere.

Problem to Solve:	Realm Inform Solution:
Church administration needs a solution for managing their congregation.	Administrative Assistants and Database Managers use Realm Inform to maintain their church's membership. From profile management to adding contributions or activating online giving to running reports, Realm Inform equips administrative staff with the fundamentals to manage their church database.
Pastors need tools to better understand their ministry.	A pastor's job is never done. That's why they use Realm Inform to access ministry insights, such as giving trends and demographics through dashboards. They also have access to Realm Shepherd - an app built specifically for pastors - which allows them to view details about their congregation, their discipleship journey, and more, even when pastors are away from the church.
Church staff need a way to manage their church's database from anywhere.	Churches who operate with an on-premise database are at the mercy of uncontrollable situations. Since Realm Inform is in the cloud, the church can access and manage their database from any location with an internet connection.

## Realm Inform Advantages:

- Administrative staff can access and manage their Realm Inform database from any location with an internet connection.
- Pastors can access ministry insights through dashboards in Realm Inform and view congregant details through the Realm Shepherd app.
- Ideal for smaller churches or those interested in a foundational church management solution with less bells and whistles.

## Key Features:

- Manage your entire congregation's records
- Provide online giving for your congregation
- Manage all contributions, including cash, checks, and other donations
- Access and manage integrated Realm Accounting and Payroll
- Create up to 75 custom fields for better management of records
- Shepherd your congregation with discipleship tracks
- Access ministry insights through dashboards
- Run detailed, pre-defined reports about your membership, giving, and more
- Create on-the-fly reports based on information in your database
- Provide staff with the proper administrative rights and permissions
- Run background checks on staff and congregants
