

Profiles & Directories

Record and track what's most important in your ministry

Having the right tools to manage all the details of your congregation is critical to operating your church effectively. That's why Realm Profiles & Directories provide your staff with a single place to document everything you need to know about how your congregation is growing with your church.

Problem to Solve:	Profiles & Directories Solution:
Staff use multiple solutions to view an individual's journey with our church.	Most church staff find themselves jumping from one tool to another to see a full picture of an individual's journey. That's not the case with Realm Profiles. Realm Profiles presents the individual's entire journey with your church - the discipleship tracks they're on, events they've attended, groups they're in now or in the past, and more - so you can have a clear picture of their engagement with a single click.
Staff need to track important details that are unique to our congregation.	Every church is unique. Because of that, you need the flexibility to customize exactly what you track. With Realm Profiles, your church can customize up to 75 unique profile fields, each with its own custom parameters. From allergies to t-shirt sizes or favorite ice creams, if it's important to your church, you can track it with Realm Profiles.
We need flexibility to promote a directory that's most beneficial to our church culture.	Printing a church directory is becoming more antiquated as the years go by, not to mention a costly process for the church. Realm Directories allows your church to offer an online directory for both staff and the congregation so everyone can stay connected no matter where they are. For churches who still prefer a printed version, a detailed family directory is available.

Profile & Directories Advantages:

- Realm Profiles allow a one-stop-shop so staff can know everything about your congregation. Each profile contains personal, family, and contact information, giving history, volunteer info, private notes, and more.
- Privacy and security are important to your church; that's why profile information is only available to staff unless you allow others, such as group or serving team leaders, to view congregant information.
- Updating profile information is time-consuming for staff. That's why Realm Profiles allows your congregation to update their own information. However, staff can turn off certain fields if they'd prefer to manage those at a staff level.
- The Realm Directory is built for both your staff and congregation. Both can view it from within Realm, but staff can also view the directory in the Realm Shepherd mobile app and congregants can view it in the Realm Connect mobile app.

Key Features:

- No limit on profiles; create as many as needed
- Customize up to 75 unique profile fields
- Add new profiles on the fly
- Document spiritual life milestones
- Keep confidential information secure
- Launch an online directory or print one if preferred
