

*Reach, engage, and disciple your congregation and the community outside of your church's walls.*

With Realm Streaming, you can live stream sermons and events or share recordings and videos with your congregation and online community.

Problem to Solve:	Realm Streaming Solution:
<p><b>Churches want to engage with their members.</b> Congregants may not be able to attend your live services or events, but want to worship together.</p>	<p>Members can watch sermons and events live or view recordings at their convenience from their mobile device or computer.</p>
<p><b>Churches want to connect with their members throughout the week.</b> Small groups, children's ministry, and other programs in your church happen throughout the week, but not everyone can attend.</p>	<p>Members can attend meetings virtually or access on-demand videos related to their specific programs or interests.</p>
<p><b>Churches want to reach non-members.</b> Potential members want to learn more about your church prior to visiting, and are curious about your culture, style, and programs.</p>	<p>Visitors can watch your live stream or recordings to see your worship style, hear your sermon, and become comfortable with the atmosphere before they visit.</p>
<p><b>Churches want to control their online presence.</b> Social media and free video uploading platforms provide little opportunity to incorporate your church's branding. Further, they inundate viewers with ads that may not be suitable to your audience.</p>	<p>Customize the look and feel of your streamed content and videos to match the branding and style of your church, and provide an ad-free experience for your members and visitors.</p>
<p><b>Churches want to understand their online engagement.</b> Content can be shared across multiple platforms, making it difficult to track what viewers are engaging with and who they are.</p>	<p>Track overall viewership in one place. A geographic and demographic breakdown of viewership allows you to gain a better understanding of how your online community is engaging with your ministry.</p>

**Churches Can:**

- Stream sermons and special events
- Share recordings and videos
- Allow viewers to watch ad-free content from mobile devices or computers on multiple platforms
- Capture data about their viewers

**Key Features:**

- Unlimited streaming
- Unlimited administrators and viewers
- Customizable look and feel
- Basic editing capabilities
- Share content on multiple platforms
- Ad-free experience
- Viewership and utilization analytics
