Stewardship

Maximize your ministry's stewardship efforts.

Giving is the lifeblood of your ministry. ACS Technologies (ACST) provides ministries of all sizes with multiple options for giving and payments, donation management, in-depth analytics to help leadership make the right decisions for your ministry.

Problems to Solve:	ACST Stewardship:
Members need to be able to give and set up pledging from anywhere, anytime.	Your members and others in the community want to donate to your ministry, but it has to be on their terms. That's why ACST provides everyone with multiple ways to give via text, mobile apps, and online through debit/credit cards and ACH. Ministries can even add custom online giving and pledging options to their website. Finally, anyone - long-time members or first-time guests - can set up recurring donations or make one-time gifts.
Ministries need tools to communicate with donors.	Because donations are crucial to your ministry, you need solutions that help you effectively communicate that message to your membership and community. ACST's communication tools integrate with giving and pledge data to support all your stewardship goals. Whether you need to build communication templates for first-time donors, send contribution statements, or anything in between, your ministry will have the tools it needs to reach donors.
Ministries need access to stewardship reports and metrics.	Having access to in-depth reporting and metrics should be a key part of every ministry. ACST helps stewardship directors and leaders better understand their ministry's giving by providing analytics and dashboards for pledges, giving via online, cash, and check, fund metrics, giving by demographics, and more.

ACST Stewardship:

- Create custom branded online giving and pledge forms for any ministry and upload to your website

- Meet your members and community where they are with eGiving through mobile apps, text, and online

- Allow anyone to set up recurring donations, even visitors or first-time guests

- Communicate your ministry's need for giving through dedicated channels and mobile apps built for your members

- Accept payments for registration events which flow directly into integrated accounting solutions

- Access in-depth analytics for every aspect of your stewardship ministry - from funds, pledges, online giving, demographics, and more

- Integrate accounting with contributions and giving to provide a one-stop shop for stewardship ministries

- Allow members to see their own giving history and even print giving statements to help save you time and resources
