The Florida Conference
OF THE UNITED METHODIST CHURCH

ACSTechnologies

ACS Technologies offers solutions and services for all areas of your ministry including people management, communications, finances, operations, missions management, IT services, and more!

We're committed to continuous innovation and improvement to ensure our solutions and services continue to provide value as needs and opportunities evolve and grow. We serve with intention and put our ministry partners first, providing expertise and guidance every step of the way and offering unparalleled support to all of our ministry partners.

MinistryPlatform

Support your ministries and operations with church management functions, customization capabilities, communication and engagement tools, powerful reporting, and APIs and integrations. MinistryPlatform provides churches with a solution that can meet their individual, unique needs.

realm

Unify your pastors, staff, volunteers, and congregants with a single system for church management, communications, events, discipleship, giving, and finances. Realm is a cloud-based, out-of-the-box solution that includes an integrated website as well as integrated giving, accounting, background checks, email, and texting.

MISSIONINSITE

Allow your church to learn about, visualize, and cultivate current and prospective members with this web-based analytics tool. MissionInsite is powered by multiple sources such as Experian and ACS Technologies' proprietary American Beliefs Study, providing demographic and socioeconomic information about your congregation and community to help you build and shape your ministries.

Go Method

Automate your missions, camps, and retreats with an integrated, due-date based event management solution. Go Method will take your events to the next level with management tools including personal fundraising, applications and registrations, document tracking, reporting, and more.

Growth Method

Manage and automate essential ministry processes, communications, and assimilation tracks to help you pastor people better. With Growth Method, you can capture key information about visitors and congregants, provide personalized and automated communications, manage daily tasks, and analyze ministry engagement.

HIGHER GROUND
MANAGED IT

Managed IT services include consulting, security, and management services for all of your technology needs. Services include assessments, hardware and software recommendations, and management of your IT stack. Our complete suite of options gives you peace of mind knowing that your IT devices, users, and data are secure and operating efficiently.

As your ministry partner, we will be with you every step of the way. Onboarding assistance, training, and live support are available for all of our solutions.
